Cybersecurity - Driving Change

Snow in Alaska

A former employee who now lives in Alaska sent me this picture that was taken last week. I found it to be a funny juxtaposition to what we've been experiencing in the lower 48 lately. Thanks Tom!

The Board's Role in Driving Change and Strategy

I serve as a cyber security liaison for the Private Directors Association. My role is to assist in bringing timely and relevant information to our members - our educational efforts are presented through subject matter expert webinars, whitepapers, and other opportunities that allow members to stay on top of the latest information. I hope the following articles will be useful in your efforts to stay on top of your cyber security issues.

Part 1: [Risks of Not Automating](#)

Part 2: [Cybersecurity Hygiene](#)

Best,
BJ
